At Annual Meeting

Church Reports Year Of Steady Progress

The year ended in December of 1946 revealed 12 months of steady progress for Wesley United Church, and the beginning of the new year has been such that an even more accelerated advance may be confidently expected. It was learned from reports of the church's many committees and affiliates within the congregation and friends gathered Friday evening for the annual meeting.

In the minister's address the congregation was called upon for an increase of personal evangelism as a result of the year's progress.

"THE WORLD may seem at times an impossible place in which to do the work of God, but who are Christians called into the world but to do the impossible by God's power? To that end I give you a couplet which has inspired me greatly," said Mr. Carter.

Heaven's gate is shut to him who comes alone.
Save thou a soul and it shall open to thee.

The minister in conclusion recommended the couplet as an ideal slogan for 1947.

Membership showed an appreciable increase during the year. Beginning 1946 with a total of 339 there were 25 persons who joined the congregation. Twelve were removed by transfer and there were four deaths, leaving a total of 381, total resident and non-resident.

THERE WERE 20 special events during the year. The two highlighting the season were the well-attended thirty-second anniversary of the Wesley United Church on May 19, and the annual bazaar and social on June 15. The bazaar was extended to the Rev. Mr. Carter and Mrs. Carter on Sept. 11, 1946.

Reports of the numerous fund campaigns showed that 83 members subscribed nearly \$4,000, which will be paid over a period of three years. Over \$2,000 has already been received in the campaign started at Toronto.

HIGHLIGHTING the meeting were the reports of the committees established by former ministers followed by Wesley new ministers, the Rev. Alfred Carter, B.A., B.D., who took over the pastorate in September after Rev. James H. B. accepted a call to a new church in the south end of the United States.

"As we look back over the last decade we must indeed give thanks for the way in which God has prospered Wesley," said the minister.

POWERFUL

To Be Staged Feb. 27-March 1

Glenora Club Plans Big Ice Carnival

Edmontonians who like their ice sports with artistry and vivid pageantry will have the greatest entertainment treat in winter carnival history on Feb. 27-28 and March 1, when the Glenora Skating Club stages the 19th annual carnival and ice show at the Edmonton Arena.

THIS WAS DISCLOSED at a news conference held by the club on Monday night. Mr. Huff, who is president of the club, said that the carnival committee is this year sponsoring no expense to the public, but will have a charge of the show and other interested parties, by Carnival Masquerade.

Mr. Huff said that the carnival committee is this year sponsoring no expense to the public, but will have a charge of the show and other interested parties, by Carnival Masquerade.

Thousands of dollars will be spent to bring the greatest winter entertainment to the city, said Mr. Huff.

Mr. Huff revealed that Bill McCusker, until 1944, skating partner of Sonja Henie in motion pictures and public ice performances, will perform here along with his wife of recent date, the former Joanne Rupp.

IN ADDITION, 75 voluntary workers who have been prominent in Red Cross work for many years were named to the executive.

President and convener of women's work is Mrs. Richard Proctor, vice-presidents are H. B. Brown and M. Campbell Fraser, treasurer and chairman of the disaster relief committee is A. H. Skendzel, secretary-manager is Robert Muir, and honorary solicitor is F. C. Jamieson, K.C.

Runners-up in their skating for the 1946-47 season in 1946, they were selected to represent the U.S. at the world international skating championships in Sweden on Feb. 16 next.

They will be flown from Sweden to New York and Edmonton.

Hennie Rupp, world fabled champion of the ice shows, for 18 years, is also coming.

Bruck heads a trio of skating in the finals. The other two are Goodhart and Dot McCusker of the "Hollywood on Ice" show.

Mr. McCusker will display something entirely new in the way of novelty by performing a number of intricate maneuvers on his skates.

The Glenora club will be the most brilliant in history, it is predicted.

More than 200 in all, ranging from veterans of many years experience to tiny tots performing for the first season, will be displaying their talents.

Training is almost completed.

Freedom is in danger of becoming a legend and a memory in Canada. The King government is endeavoring to perpetuate the powers that were voluntarily surrendered during the war, and the C.P. stands in support of the government, contending the government is carrying out their program, though not as fast as they would like to see it carried out.

This statement was made by John G. Dickinson, K.C., MP for the riding of Edmonton, who is a member of the board of the annual banquet of the Alberta Progressive Conservative Association held Friday night in the Macdonald hotel.

He said the present government is controlled by bureaucracy that insists on controlling every phase of our lives. The C.P. advocates this, because without controls, they cannot bring in their system.

Mr. Dickinson said that the government is carrying out their program, though not as fast as they would like to see it carried out.

Mr. Dickinson said that the government is carrying out their program, though not as fast as they would like to see it carried out.

To Freedom in Canada

People's Indifference Termed Grave Threat

Freedom of enterprise, choice of employment and collective bargaining, of worship and education are in jeopardy in Canada today, because of a lack of knowledge of the average citizen, and because of the apathetic indifference of far too many Canadians, W. J. Sheridan of Montreal, said in Edmonton Friday.

HE WAS GUEST SPEAKER at a luncheon meeting of the advisory committee of the Edmonton Chamber of Commerce in the city.

Manager of the department of economic development, Canadian Chamber of Commerce, Mr. Sheridan was a visitor in Edmonton in the course of a visit to western chambers of commerce.

Charles E. Gurnett, president of the chamber, said that the government power which the people will find it difficult to get rid of is "communism."

"COMMUNISM is an organized, and fanatical world movement," he said, "which capitalism must die at the hands of a bloody revolution."

He outlined the means by which pressure groups are getting to know the country, and thus with their ends.

There is one major problem facing Canada today, he said, which must be solved if we are to build "freedom for tomorrow."

Let us not be a nation, he said, that should be a nation, decide to develop our capabilities, or private system, unless we have the country of ours has grown to its present stature, or shall we abandon it in favor of a collective system.

"As a nation, we need a greater sense of national unity and a common interest in a common cause."

He said that the government power which the people will find it difficult to get rid of is "communism."

Monday Services in Churches

Lutheran Walther League Meet Party and Sing-Song Will Open Conference

By Helen Ferris

A skating party and sing-song at Concordia College next Friday evening will open the Northern Alberta Zone Winter Conference of the Lutheran Walther League to be held here Jan. 31 to Feb. 2. More than 200 young people from the Alberta-British Columbia district are expected to attend, and three Edmonton Lutheran churches will act as their hosts this year: St. Peter's, Grace and Bethlehem, represented by the Rev. A. J. Mueller, the Rev. C. I. Klewer, and the Rev. A. Appelt, respectively.

In keeping with the educational campaign being conducted by their denomination, the conference motto will be "Ye Shall Be Witnesses Unto Me," and the theme of the Saturday afternoon session "Each One Teach One."

This session will probably be the largest ever presided over by the chairman of J. Ambruster, members of Grace Walther League will show how to contrast the unchurched, demonstrating a few types of likely responses and the answers to be given to the unresponsive. Arnold Knobel will speak on "Responsibilities of Society Officers."

At 1 p.m. there will be a banquet and program at the YMCA. Sunday morning there will be special worship services in the host churches.

THE TALENT QUEST held Sunday afternoon at Concordia College chapel will probably be the highlight of the entire conference for many young people. It will consist of 18 possible divisions, the 3 main classes being: music-instrumental and vocal solo, duets, etc.; handicrafts-including fancy work, wood and leather work, etc.; literature-poems, essays, short stories, photographs, etc.

All leagues who receive a rating of "Superior" or "Excellent" in the talent quest are eligible for the district talent quest in Calgary, Alberta, next summer.

The annual international convention is held in western and western states during the summer months for the purpose of making it accessible to all contestants. Awards will be given to the winners.

THE REV. A. J. MUELLER

THE REV. C. I. KLEWER

THE REV. A. APPETT

FROM WINNIPEG: The Rev. H. C. Heffern of Winnipeg who will conduct a series of meetings in the Church of God, 29 Street and Avenue, from Jan. 28 to Feb. 2.

Sunday meetings will commence at 7:30 p.m. and week night meetings at 8 o'clock. Mr. Heffern is the author of a number of Bible study courses.

(Continued on Page 7)

7:30 p.m. Dreamland Theatre

Rev. J.D. Carlson Speaks: "What is wrong with Playing Cards and Gambling?"

He will answer these questions: Is it wrong? What is wrong in betting and gambling? What is the difference between card games and other games? Hear what the "King of Hearts" and "Joker" cards stand for.

Also

Hear child solo sing the Gospel along with other special items of outstanding interest.

And Remember

Last Sunday over 700 people braved 15 below zero weather to attend the service—some come early.

Re-15 a.m.—Sunday School—Classes for All.

TODAY'S MESSAGE

The Gift of Service

"Stir up the gift of God which is in us," was the challenge given by St. Paul to one of his close followers. What this command means is that every Christian has talents and capacities which he must utilize for the glory of God, the good of his fellow-men, and the advancement of the Christian faith.

Many have responded to St. Paul's injunction by asking: "What can I do?" We may object that we have not the ability to preach the Gospel, to teach others, or the strength of training to organize movements for the alleviation of social and economic evils that call for Christian action.

The answer to that is simple. A soldier is not called upon to be an expert in military strategy or to command other men. There are others more gifted and skilled in these matters and to such the role of leadership is given. But no battles can be won without soldiers, nor can any movement, however well planned, succeed unless it has devoted and conscientious followers.

Christians are soldiers in the service of God and the gift in them is the power to render service. It makes no difference whether that service is small or great. It is enough to know every station in life is filled with opportunity. Men and women can serve God by being good workers or good parents. Children can serve Him by giving respect and obedience to their guardians and by using their time profitably in study and play.

Whatever other endowments we lack, all of us have one gift in common—the power to live Christian lives. God's two great commandments are that we love Him and that we love also our neighbors. If we offer God our prayers and worship, yield our wills to Him, make offerings of all we do, we shall surely please Him. Then our neighbor we extend courtesy, cooperation and understanding, and share in his burdens and trials, we shall truly make use of the gift within us.

COME TO CHURCH THIS SUNDAY

Lord raleth them that are bowed down: the Lord loveth the righteously. (Psalms 146:8). "The question," says the Lord, "is answered by demonstration." We shall see both disease and sin; and this demonstration shows that Christian healing comes from the Lord's health and makes the best use of the Scriptures, by the best Eddy, Dr. P. Eddy.

Christian Science

The lesson-Sermon at Christian Science churches on Sunday will give an exposition of the subject, "Truth." It is drawn from passages like these: "The truth cometh out of the eyes of the blind."

Pastor to Speak At Tabernacle

In the Sunday evening evangelistic service at the Dreamland Theatre, the Rev. J. D. Carlson, the Pastor—Evangelist of the Beulah Tabernacle, will speak on the subject "What is wrong with card playing and gambling?" Vital questions will be answered by the speaker in his sermon.

He will state what makes card playing and gambling wrong and in his declaration he will reveal the true meaning of the "King, queen, and joker" cards. This promises to be information many have never heard before. Special features which will also be heard in this service among which will be gospel singing by a child soloist.

In his Sunday morning service which is held in the Tabernacle, 96 Street and 107 Avenue, the minister will speak on this theme: "The filling with the Holy Spirit; what it is—what it is and what it does." If the subject of the apostle-filled life has puzzled and perplexed you this sermon will help you to gain a new and Scriptural understanding of the truth. All are invited and a welcome is awaiting at the Edmonton general of evangelism, missions and Bible teaching.

Young People's Column

MR. ROBERT MILLER, executive secretary of the Institute for Juvenile Friendship, is attending a young people's meeting in McDonald Baptist church on Friday, January 31, on "Breaking Down Racial Barriers." Young people of all denominations are invited to attend.

Mr. Miller, a retired Vancouver business man and a Rotarian, voluntarily devotes a great deal of time and effort to the promotion of inter-racial friendship, not only by speaking before church, youth, and other groups, but also by personally finding employment in Vancouver for Negro, Japanese, and Hindu, whom the color-line bars.

The Young People's Society of St. Andrew's Presbyterian will conduct the evening service tomorrow, and the young people's choir under the direction of Doug MacKay will sing the solo, "Twelve Tests of a Christian," by Harry Emerson Fackell, which the young people have been studying during the past month. Miss Anne Dickson will give the Scripture reading and prayer, respectively. Rev. J. Gordon Trever, acting minister of the church, will pronounce the benediction.

Since coming to the church in December, the Rev. Trever has taken a great interest in the activities of the Young People's Society, and feels quite confident that in placing this service in their hands it will give them experience to take future services of this kind.

Norwood YPU have been holding two meetings each week, Friday and Sunday. The Friday meetings are devoted to a play for the drama club, work on the weekly newspaper which they are editing, and a game period. Sunday's feature is a freestyle, of which the four conveners have charge.

The Norwood group have been conducting evening services every second Sunday. The group, which are the afternoon services at 8:00 p.m. for the winter months.

Members held a ride last night, after which they returned to the home of Miss Helen Cross for refreshments and dancing.

Members of the United Church YPU at Clover Bar are working on the Home Rule for the church as their present project. They have already held two of three social gatherings, and on alternate Sunday evenings the girls serve lunch. They are also planning a cultural program, of which we shall hear more later. The group, consisting of fourteen regular members and five others was organized last fall by the Rev. Maurice Johnson.

The "Two by Two Club" for young married couples held their annual meeting and election of officers Wednesday evening.

The new officers are: president, Mr. and Mrs. George Robertson; secretary, Mr. and Mrs. J. H. Hart; and Mr. and Mrs. C. Fraser; refreshment conveners, Mr. and Mrs. Bruce Campbell; secretary-treasurers, Mr. and Mrs. John Dutton.

A talk on "Weather Forecasting" was given by the Rev. H. R. Tingle, newly appointed Missionary Secretary of the Canadian Synod, at the St. Andrew's church on Thursday, Jan. 30.

Another important visitor to the campus during the week was Gordon Campbell, Canadian secretary of International Student Service, which is parallel to the World Student Service in the United States. He was here to organize a committee to launch a campaign for ISS in Canada and to sponsor other ISS projects for international understanding, such as student exchange.

Speaking of SCM activities, we haven't forgotten that we promised to tell you more this week about their "care parcels" and Relief to Europe and Asia project. In the event that some of your church groups might like to adapt the same policy, however, due to an unusual

GEN. BRADLEY RECEIVES CIO'S PHILLIP MURRAY AWARD IN CAPITOL

POLIO-SMITTEN, MOTHER BEARS NORMAL DAUGHTER IN TRENTON, N.J.

Copyright, 1947, by Arno Newspictures, Inc.

BUFFALO CHURCH GUTTED—Firemen battle this spectacular three-alarm fire which virtually destroyed the Church of St. Mary of Sorrows in Buffalo, N.Y. Damage was estimated at \$300,000. Preparations were under way for the Church's 75th anniversary.

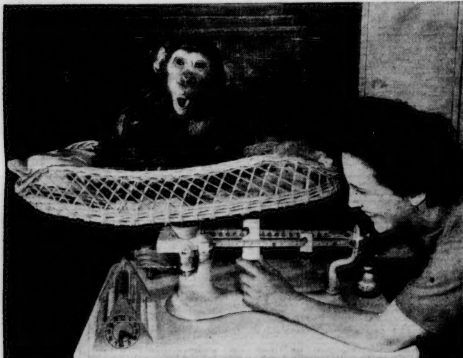

HE WALKS AGAIN—Learning to walk again, little Jimmy Gilmore of Columbus, Kansas, clings tightly to a "walker." Little Jimmy became a polio victim four months ago.

TOO CLOSE—The rear wall of this building collapsed into an excavation that had been dug too close to its foundation in Tacony, Pa. Although a restaurant was on the lower floor, no one was injured.

VETERAN KILLED, FIANCEE INJURED—This is the wreckage of an auto after it was struck by a Long Island Railroad train in Hempstead Gardens, L. I. Richard Stanley, a Navy veteran, was killed and his fiancée, Jane Alford, was injured.

NO MORE CHOCOLATE CAKE FOR HIM—Surprised whistle contorting the face of Billy the Chimpanzee is caused by what Mrs. Helen Martini reads on the scales. Billy forgot all about his diet and is getting the bad news at New York's Bronx Zoo that his rations will be cut.

GROUNDING CHINESE PLANES—Grounded planes of the Chinese National Aviation Corp., and the China Air Transport Corp., stand idle at a Shanghai airport. Both companies were ordered to suspend operations for a week following a series of tragic plane crashes.

AN AWARD FOR THE GENERAL—Veterans Administrator Gen. Omar Bradley receives from disabled veteran Robert Smiljanic, of Aliquippa, Pa., CIO's Phillip Murray Award for 1946, for making the most outstanding contribution to the welfare of veterans during the year, while CIO officials look on at ceremony in Washington.

IN GOOD HANDS—New York City's tallest policeman Francis Hawley escorts four-year-old Nancy Drury up a busy street where the little March of Dimes poster girl participated in ceremonies launching the 1947 campaign.

TURNABOUT—Dr. Fabien Sevitzky smilingly introduces band-leader Fred Waring to his Indianapolis Symphony audience before handing over the baton to the popular bandleader during a musical contest between the two.

RISKY RESCUE—Firemen lower J. H. Ganerich from the top of a Minneapolis grain test tank after he was overcome by fumes while testing grain at the top of the tank. Another worker overcome by fumes was lowered in the same fashion.

POLIO MOTHER BEARS NORMAL CHILD—Paralyzed from the waist down as a result of a polio attack in October, 1946, Mrs. Grace Maier, 24, right, of Trenton, bore a normal daughter. A nurse at left holds five-pound, nine-ounce baby.

A NEW SUPERINTENDENT FOR THE ACADEMY—Vice-Adm. Aubrey W. Fitch, left, congratulates Rear Adm. James L. Holloway, Jr., in Annapolis, Md., his successor as Superintendent of the U. S. Naval Academy.

Adventure! — "Steve Canyon" By Milton Caniff — On Comic Page Today

Ask Lower Income Taxes

"If Any Tax Relief is Given, it is to be hoped that it may be Applied Particularly in the Field of Personal Income Taxes"

The Honourable Leighton McCarthy, P.C., K.C.,

Chairman of the Board at the Annual Meeting of National Trust Company

As was to be expected, the year 1946 was in many ways a troubled one. There have been moments when progress seemed disappointingly slow, but progress has in fact been made. We are entitled to find comfort in the fact that there are fewer clouds today than some months ago.

Similarly the domestic affairs of this and other countries have exhibited at various times throughout the year a discouraging picture of industrial strife. Here again the picture is brighter to-day. Both in international affairs and in industrial disputes the great task before us all is to replace violence by the rule of law.

RELIEF FROM HIGH INCOME TAXES

Apart from the settlement of these basic issues probably the need most keenly felt by our people is for some relief from the very heavy burden of taxation they have been bearing. Of course, it is not possible for this or any country to fight two great wars in one generation without incurring great responsibilities that must be discharged. Some of those who complain most loudly about high taxation are also the most critical of deficit financing as a solution. We cannot have it both ways. If the interest on war loans, pensions, family allowances and so on are to be met out of government revenues, as over a period they must be, then no return to pre-war levels of taxation is a possibility. Nevertheless encouraging reports about the state of the country's finances

do enable us to hope that some measure of relief from the current high levels of taxation may be possible and, if so, all parties would unite in welcoming them.

CANADIANS ATTRACTED TO U.S.A.

If any tax relief is given, it is to be hoped that it may be applied particularly in the field of personal income taxes. The income tax is felt directly by nearly everyone and there is some evidence its weight has been a contributing cause to industrial disputes. Moreover reference is often made to a comparison of rates of income tax in the United States. While such comparisons are not always fair, they carry weight with many people, particularly young men deciding where to employ their talents. We have lost many of our best and brightest in the war. It would be a double tragedy if we now lose still more of our young professional men and technicians by emigration.

The burden of the personal income tax presents itself to a trust company in almost every possible form. The vast majority of our beneficiaries are not people of great wealth but of moderate means dependent either wholly or in large part on the income from the trust funds in our care. From the economic point of view these people have suffered more from the war than any other single class. They are entitled now to whatever measure of relief it may be possible to give them.

SUCCESSION DUTIES CHANGED

A year ago I expressed the hope that solutions could be found for the vexed questions of Dominion-Provincial relations. Such hopes have not yet been realized, although the outlook for eventual settlement is not perhaps quite as black as it is sometimes made to appear.

To meet the possibility that some provinces might agree to abandon succession duty taxation while others did not, the Dominion doubled its rates of succession duty. At the same time it provided that if succession duties were also payable to any province, the amount of such provincial duties would be accepted as a credit up to one-half of the Dominion duties. It would seem to be a fair inference from these changes that there was no intention to make any substantial increase in the total amount of duties that would have to be paid. In fact, in the vast majority of estates the changes do not result in any increase. But there is one type of situation in which a large increase in taxes does follow as a result of the changes in rates. The case I refer to is that in which the whole or a large part of an estate is bequeathed for charitable, religious or educational purposes.

Under the Ontario Act such bequests are free from any tax; under the Dominion Act they are free only to the extent of one-half the estate. If, therefore, anyone in Ontario leaves more than half his estate to charity the succession duty

rates on the amount over and above one-half have in effect been doubled. For example, in the case of an estate of \$2,000,000 all passing to Ontario charities, the total duties payable would now be approximately \$750,000 instead of \$750,000.

CHARITABLE DONATIONS AFFECTED

It may be objected that such cases, i.e., cases of large estates going largely to charity, must be relatively few in number. That of course is true, but their importance is not of proportion to their numbers because of the amounts that may be involved. Religious, charitable and educational institutions have in the past benefited very largely from bequests by wealthy benefactors, particularly those with few dependants. Many educational institutions have derived a large part of their endowments in this way, and some were founded as the result of such bequests. I cannot believe it was the intention of the Government to discourage charitable donations or to penalize institutions that exist solely for the public good. Now that the effect of the changes referred to has been drawn to the attention of the proper authorities, I would hope amendments can be made to relieve such institutions from a burden I do not believe it was intended to impose on them. Such changes are required to rectify a situation that is, to say the least, anomalous.

More than a Million Dollars a Month Paid on Behalf of Beneficiaries

H. V. Laughton, K.C., Vice-President and General Manager

The statement presented to the shareholders to-day shows an improvement in every way in the position of the Company. Assets under administration at the end of the year total \$337,000,000. This figure represents an increase over last year of \$11,000,000 and over the past twenty years of almost \$180,000,000.

\$150,000,000 PAID IN TEN YEARS

In the past ten years total payments to or on behalf of those for whom we act in various fiduciary capacities reached the amazing total of over \$150,000,000, an average of more than a million dollars a month. The net increase in the total of the assets held in this account was approximately \$50,000,000.

The foregoing figures demonstrate far more effectively than anything I can say the continued and increasing confidence of the public in our Company. The Trust Company is a service organization, and only by giving efficient service can it hold its business and look for new business in the future.

CHOICE OF EXECUTOR IS IMPORTANT

What I have just said regarding the growth of our business indicates that more and more people are giving very careful consideration to the choice of an executor. Too many have allowed that choice to be more or less determined by matters of friendship or negligible saving in cost of service. In many cases where the choice has been a corporate executor the selection has been made on the assumption without investigation that one Trust Company will do as good a job as another.

Since this Company was founded almost fifty years ago, there is one thing perhaps above all others that has impressed me. I refer to the adherence to the principles of integrity and strict trustworthiness laid down by the Directors and established firmly by the first General Manager, Sir Thomas White.

There has been another very substantial increase in the potential business of the Company which does not appear in the Balance Sheet. I refer to the appointment of the Company as executor of wills of those who are still living. We have found that more and more people instead of worrying in a general way about succession duties and taxes are approaching the matter in a logical manner. More and more advantage is being taken of our willingness to give advice based not on theory but on actual administrative experience and study, and although this service has been given without any suggestion of obligation it is resulting more and more often in our appointment as executor.

TRUSTEE FOR MORE PENSION PLANS

In my remarks last year I referred to the services we were prepared to offer to employers in setting up pension and superannuation plans. During the year we have assisted in working out numerous new plans, and I am pleased to report a gratifying increase in the number of plans under which we have been asked to assume the duties of trustee. The experience gained in recent years puts us in even a

better position to be of real assistance to employers who are considering such arrangements for their employees.

In referring to pension and superannuation plans I must make some reference to an amendment to the Income Tax Act made at the last session of the Dominion Parliament. As the law stood until the 26th of June, 1946, where a single lump sum payment was made out of a superannuation or pension fund or plan upon the death, withdrawal or retirement of an employee, one-third only of such amount was taxed as income, and where such a payment was made other than out of a superannuation fund for loss of office or employment one-fifth only of such payment was deemed for the purpose of taxation to be income of the taxpayer in the year in which it was received and one-fifth deemed

to be income in each of the four succeeding years. In other words, where a lump sum payment was made instead of providing an annual retiring allowance the Government in the one case allowed an exemption of two-thirds and in the other allowed the sum to be spread over five years for taxation purposes even though it was paid in one year.

TAX AMENDMENT PENALIZES PENSIONERS

This was a very fair provision, as the taxing of the whole amount in one year would have amounted in many cases almost to confiscation of the whole amount owing to the heavy rates of taxation. Under the amendment to which I refer the concessions have been repealed and in the case of any such lump sum payment made after the 26th of June

last the whole amount will be taxed and taxed in one year. The only alleviation of the hardship produced by the taxation of this whole amount in one year is the option given to the taxpayer to have it taxed either as part of his income in the year he receives it at whatever rate may be in force or to pay taxes on it in the year he receives it at the average rate of taxation he paid in his last year of full employment with the company with which he was employed.

These Companies and Insurance Companies may perhaps more clearly than a private company be expected to provide for their beneficiaries. They have been very much disturbed and hope that upon further consideration some basis of spreading the taxation over a period of years will be reached. The total amount involved in taxation cannot be important in relation to the total of taxes imposed, and during a period when taxes are being reduced it seems difficult to defend a change in policy that will increase the taxes against individuals mostly of small income and at a time when owing to death or loss of employment income has been reduced.

COMPANY AIDS DEPENDENTS

In these days when taxing governments upon the death of a person the upsurge upon duties have been paid or secured we are often asked how we manage to provide for the living expenses of widows and other dependents until assets can be released and cash made available. If there are liquid assets we can usually arrange for release of a reasonable amount upon giving our personal bond or lodging security. In any event we do not hesitate to advance our own funds to meet the immediate necessities of the family.

LOWER INCOME TAXES IMPERATIVE

The Chairman has referred to the urgent need of reduced taxation. We have seen a great deal in the press lately regarding the number of Canadians going to the United States in many cases by the lower rates of taxation there. This is a very serious matter indeed, and if the suggested 20 per cent. cut in the United States personal income taxes should become effective a great impetus will be given to this undesirable movement. Even at the present time, taking the taxes that will be in force for 1947 in Canada and those which were in force for 1946 in the United States, a married man with two children residing in Canada pays 33 per cent. more on an income of \$10,000, 34 per cent. more on an income of \$7,500, 45 per cent. more on an income of \$5,000 and 28 per cent. more on an income of \$2,000. If the suggested U.S. reduction becomes effective these percentages will be increased to 66, 82, 84 and 60 respectively. It is imperative that some further reduction be made in Canada regardless of what is done in the United States.

Our savings deposits once more show a very substantial increase of more than \$1,000,000, amounting at the end of the year to over \$25,000,000, even though there have been heavy withdrawals by depositors for investment in Dominion of Canada loans. The liquidity ratio to trust deposits is now over 100 per cent.

54,000 Maternity Cases Result In \$1,529,241 Expenditure

Alberta Leading Dominion Providing Health Services

Deputy Minister of Health When it comes to the provision of health services, Alberta, next to take second place to any other province in the Dominion. She has already marked up many "firsts" in continuing to forge ahead with a most progressive health program. She is still the province which the Dominion, and indeed, the world, on the one hand, to provide free hospitalization for maternity patients. Since the inauguration of this service in April, 1944, the provincial department of public health has expended an approximate total of \$1,529,241 on approximately 54,000 maternity cases.

Alberta is still the only province to have set up a division of public health epidemiology for the study of insect-borne disease such as Rocky Mountain spotted fever, typhus and plague. This unit has conducted comprehensive surveys in the south of the province and in the north, and is continuing its work with the investigation of areas harboring such diseases. This is accomplished by means of field crews equipped with travelling laboratories. The interest that Alberta is the only province to have in the north. The study of the insect-borne disease greatly increases the measure of public health in the province.

Another service Pre-arranged ambulatory care for victims of infantile paralysis is another service which was pioneered in Alberta. It was instituted in 1945 and provides hospitalization as well as medical and nursing care by telephone. After the acute stage has passed, all patients who have contracted the disease are taken to the hospital for treatment and also special splints, shoes or orthopedic appliances required, are also supplied. Even before the passing of the Polio Bill, the province of Alberta had made special provision for the care of poliomyelitis patients in the form of the provincial special hospital, which was erected on the grounds of the University Hospital in 1927. Alberta has more general hospitals in operation in proportion to population than any other province in Canada. There are approximately 6,000 or 7 beds per 1,000 of population available. Hospitals are inspected regularly and approved hospitals receive grants of 45 cents per patient per day from the provincial government. This amount expended for this purpose in 1945 being \$292,464.75.

Through Alberta's municipal hospital plan, which was inaugurated in 1941 and which is unique in the Dominion, more than one third of the population of the province have been provided with a successful form of health insurance. There are now 32 hospital districts operating under the plan. Organization and supervision of such districts is directed under the direction of the department of public health, but each hospital is owned and operated by the people within the area. It is supported by a yearly tax on property in the district. Hospital taxpayers and supporters receive a rate of \$1.00 per day per person at their local municipal hospital.

Preventive Health In addition, rural Alberta is now receiving preventive health services previously only enjoyed by urban areas. There are a total of 18 Health Units functioning in the province—blue set up on a full staff basis and nine in which basic programs have been commenced. These provide free immunization and communicable

approximately 20,000 persons. There are approximately 481 Sanatorium beds in the province, with another 20 to be made available through the completion of a new sanatorium in Edmonton as soon as materials become available.

Free Treatment Diagnosis and treatment of cancer have been free to Albertans since 1940 when diagnostic clinics were established in Calgary and Edmonton. Patients are referred to the clinics by their own doctors, and if found to be suffering from cancer they are automatically eligible for free treatment. Specialization at public health rates is only applied where in the opinion of the cancer clinic it is necessary for the purpose of establishing a diagnosis. When authorized for this purpose hospitalization is paid for a period of 12 days and once treatment in hospital commences, the patient becomes responsible for his own hospital bill. From Jan. 1, 1941 to the spring of 1946, approximately 7,000 persons had taken advantage of provincial cancer services.

The success of Alberta's regional disease control program has been reflected in the fact that more than 80 percent of the alleged sources of infection are brought under treatment. A record not believed in the Dominion. Now doing in case-finding in the compulsory pre-natal blood test for syphilis which came into effect on July 1, 1945. Diagnosis and treatment of cancer through the provision of free surgery through

provincial clinics. Alberta again showed a lead during the past year when an agreement was made with the Federal Government, making possible the use of the services of all Indians and Metis in the district and Slave Lake areas for examination and treatment for venereal diseases.

2000 Patients There is an approximate total of 2,000 patients in residence in Alberta's four institutions for the deaf and treatment of the mentally ill. They are housed in the institutionally deficient. There is no department of health of caring for these is approximately two million cases annually. All forms of treatment, drug therapy, shock therapy and psychotherapy are given. For diagnostic and preventive purposes, there are quarantine clinics operated in Calgary and Edmonton, and their services are free to residents of the province. The need for the regulation of these services is fully recognized by the department and it is hoped they may be substantially increased as treatment becomes available.

In isolated communities where no other medical aid is available, there are district clinics, which provide both treatment and preventive services. Thirty-five district nursing areas are now in operation.

Alberta's free diagnosis and treatment services for tuberculosis and cancer are well known elsewhere on the continent. Since 1935, diagnosis and treatment has been free to all residents suffering from pulmonary tuberculosis. In 1945 a mass X-ray survey of the general population by means of mobile units was commenced. Utilizing 20 mobile units operated by the province by the Alberta Tuberculosis Association, diagnostic clinics of the Department of Health have visited more than 140 centres and 30,000

cases and results for immunization against diphtheria and pertussis in the last year.

All patients are kept by the department and this work is now aided by the use of two travelling camera units which can be receiving, formerly done by stenographers. There are 300 registrars in the province dealing with birth and death registration and the census through which the bureau learns marriage licenses.

Important in the battle against disease is the control of sanitation program. A committee of experts is maintained with regard to public water and milk supplies, food distributing establishments and industrial camps. The provincial sanitary engineer also examines and passes on all water works schemes, sewage systems and public disposal plants in the province.

Numerous Agencies Communicable disease control is maintained through numerous agencies in the province whose efforts are supervised and unified by the department of public health. Health education is carried on through lectures, leaflets, exhibits, radio, newspapers and motion pictures. The department sends out free literature dealing with all phases of health on request. It also maintains a library of some moving picture films which may be borrowed by responsible community groups.

The department is engaged in 14 separate divisions each with well

defined divisions and goals. These divisions are as follows: division of health education, division of communicable disease control, division of epidemiology, division of mental health, division of cancer control, division of tuberculosis control, division of venereal disease control, division of vital statistics, division of public health nursing, division of official advertising and the provincial laboratory.

Investigations The survey of 1945, to begin with included only Rocky Mountain spotted fever and Rocky Mountain typhus. These are common and serious diseases of considerable importance, especially in the north and in the west. These diseases are caused by ticks and are fatal if not treated early. Mountain spotted fever is the most common of the two.

There are also very important diseases which are caused by ticks and are fatal if not treated early. Mountain spotted fever is the most common of the two.

Declare Work of District Nurses Most Essential In Alberta

District Nurses are Praised For Work in Isolated Areas

Climate travelling service to the one hundred by the District Nurses, who have their posts in the most isolated areas of our province.

"They may travel by horse or dog team. They may work in one rooming place by the day, light of one of lamps. But wherever they go, they are the people of Alberta and save untold numbers of lives."

More than this, they are the ever-ready hands of health in the communities, in the classrooms, in the homes, and in the examples which they themselves set in the community.

Their service must be recognized as a public one, and not infrequently a hospital one. It has been of great importance for it has been in 1918 when they began, and continued the field staff, and it has grown in the past twenty-five years.

In 1945, the health department, through public health nursing service, under the public health nursing division of the provincial department of health as District Nurses.

Operating from her small cottage where she lives alone, the District Nurse offers a diversified program of health services.

She maintains an office supplied by the department of health with drugs and nursing and surgical equipment. Here she receives emergency calls from her patients, who either cannot reach a

doctor, or whose illness is not of a serious enough nature to require a doctor's care. From here she goes to the homes of the sick, and answers the call of sickness in the home.

In the past her maternity service has been extensive, not since the introduction of health largely dependent on the future health of her community.

Free service. On this important line, a free home nursing service, carried on through it, but at the same time through other means, as general community health control, epidemic in these isolated areas have been out to a minimum, and the children of all districts are now being given a future as one of the most communicable diseases as disease and the District Nurse can make them.

Where possible, the program also includes child welfare investigations, regular baby clinics and year-round health inspections. Assistance is given to the District Nurse in her work with every division of the health department, as well as with other other provincial and national organizations.

The treatment service of the District Nurse is indispensable, and is understood when it is realized that she is the only one (not a nurse, but a doctor) who can be called on to supply her services to the community.

And she is by no means without her usefulness, value, as it is given in the treatment of the sick. It will become proportionately greater in the preventive field. Her work in the latter field, has the advantage of being conducted at little expense to the members of the community.

She is only required to supply her services with a horse and team, and a nominal fee to the Department for treatment and drugs, while the family requiring her service is responsible for her transportation. Invariably the residents of the district are glad to do this, for it is a small return for the security provided by the nurse to the community.

During recent years, there have been more areas asking for service, and there have been more nurses to supply it. Due to the extreme shortage of trained personnel, it has been a virtually impossible task to keep every district in which the service is already established, staffed.

It is hoped, however, that more districts may be opened as qualified nurses become available. The total annual cost to the Department of maintaining the service in each district, over and above what fees are collected is approximately \$2,000 per nurse.

Another service, the organization of which is undertaken by the public health nursing division, is that of the travelling clinic. Prior to 1942, a staff which consisted of a nurse and one surgeon, one anaesthetist, two dentists, the nurse and the truck drivers, visited an average of twenty-four centres each year, providing physical examinations, dental examinations, health education and immunization, as well as minor surgery and dentistry.

Small charges. Minimum charges are made for dental and surgical operations. Where patients are not in a position to pay such charges, the service is provided free. From its origin in 1924 to 1942, when it was of necessity temporarily discontinued, the clinic visited 423 centres, examined 48,413 children, and performed 10,040 dental and surgical operations. It is planned that it will go into operation again as soon as the necessary personnel is available.

In addition to its distinctly rural services, the public health nursing division, in cooperation with city health departments, sponsors a child hygiene program adapted to urban areas, and also sponsors baby clinics and other preventive and educational work, and general educational work conducted with the health of the child.

FEVER INDICATED. The feverishness was from the Book of Job, and the minister has just read, "Yes, the light of the wicked shall be put out" when a

man in the congregation was left in total darkness. This minister was of stern stuff, though, and will scarcely be puffed by the situation.

"Brothers," he said, "in view of the sudden and startling fulfillment of this prophecy, we will send a few messages in silent prayer for the electric light company."

JUST STARTING OUT. Mission: To take a clinic worth of bird seed.

Merchant: What kind of bird have you?

Mission: I don't have any yet. I want to grow some.

24 Hr. Ambulance Service

THE KITCHEN—The PARANOID White and immaculate clean. Glistening. Perfect. Superb. Modern plumbing features.

Edmonton Health Department Is Winning Disease Battle

At the end of each year the health department reviews carefully its statistics for that year. It is by such a review that we determine our progress in the battle against disease, and also where we shall apply most effectively our greatest effort for the coming year.

At the present time the most serious problem is the battle against certain diseases. We have had two cases of measles in our city since 1946, and in 1945 we had 106 cases of this disease. The number of cases we have had in the past is a record of 284 cases in a single year, and we have only had three cases in the past few years.

The number of cases of measles has been reduced from 874 cases in 1921, to 106 cases in 1945. This reduction is due to the fact that we have had a very young age group in our city, and the number of cases has been reduced to a minimum.

The number of cases of measles has been reduced from 874 cases in 1921, to 106 cases in 1945. This reduction is due to the fact that we have had a very young age group in our city, and the number of cases has been reduced to a minimum.

HARD TIMES

SNOW had covered the hard ground for many days and the birds could find little to eat. All sorts of birds came begging food from the Teenie Weenies. The little folk gave the hungry birds as much as they could spare, but soon their tiny hoard of supplies began getting dangerously low. The big folk threw out bread, but snow would often fall and cover the food before the birds could find it.

One day the Teenie Weenie Policeman, while on his rounds near the lane, saw many mouse tracks leading into a hole in the snow. He crawled down through the hole and discovered several slices of bread which had probably been thrown out by the big folk for the birds. The Policeman reported his find to the General, who sent Teenie Weenies with picks and shovels to investigate.

The Teenie Weenies dug down through the snow and uncovered several big slices of bread.

"This bread is frozen too hard for the birds to eat," said the Cook after he had examined the bread. "If it is broken up into small pieces, I can cook it and make it into a warm mush for the birds."

A great deal of snow had to be shoveled away before the first slice of bread could be moved. The Teenie Weenies tied a string about the bread and pushed and pulled with all their might, but getting the big slice of bread out of the hole was mighty slow work.

Tilly Titter, the English sparrow, flew down while

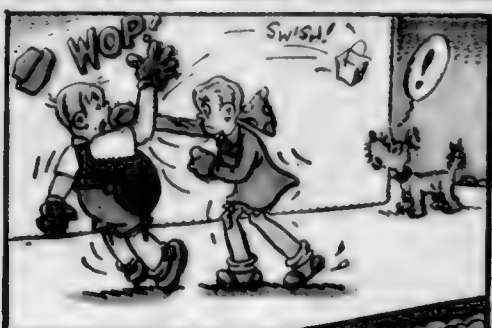

the Teenie Weenies were tugging at the bread. She caught the end of the string in her mouth and gave a mighty pull. The slice of bread fairly popped out of the hole and landed on top of the Dunce. The Dunce set up a great howl from beneath the bread. The Teenie Weenies quickly lifted the slice and the Dunce crawled out unhurt, but very angry.

"What do you mean by hittin' me with that slice of bread? Were you tryin' to kill me?" sputtered the outraged Dunce.

Poor Tilly was terribly upset, and she chirped her apology to the Chinaman, who immediately translated it to the disgruntled Dunce.

The Teenie Weenies dug out 4½ slices of bread. Then they broke them into small pieces and carried them to the Teenie Weenie kitchen, where they were cooked into a warm mush for the hungry birds. The birds were very grateful to the Teenie Weenies, but the mice who had discovered the bread, and Ginky was one of them, are furious at the little folk.
